INTRODUCING | CRYPTOCURRENCY

in 2009 The peer-to-peer system and transactions take place between users directly, without an intermediary. These transactions are verified by network nodes and recorded in a public distributed ledger called a blockchain. Since the system works without a central repository or single administrator named 'Bitcoin', It is a cryptocurrency and a digital payment system invented by an anonymous programmer, or a group of programmers, under the name Satoshi Nakamoto. Bitcoin has known as the first decentralized digital currency. Besides being created as a reward for mining, bitcoin can be exchanged for other currencies, products, and services globally.

From that, the world started recognizing the technological value of cryptocurrencies the decentralized peer-to-peer public ledgers, the blockchain, the new ways to approach security and anonymity, which have spread to a great variety of fields. The design model of cryptocurrencies has made traditional financial institutions seem obsolete by bringing new capabilities to individuals and organizations adopting them. The greatest innovation of Bitcoin is its decentralized nature. There is no person or entity in control of Bitcoin. Instead, the system is run by a network of computers, and data stored on the blockchain is distributed among them. Such distribution helps to resolve data storage and security issues. Everyone could access the data, but no one owns it, nor can change it without everyone else knowing it and make these benefits of this technology today are the facilitation of value transfers without the third parties, transfer of money in a more secure and completely anonymous way which protects users personal, also access to the global financial system with any device connected to the Internet with fewer fees.

INTRODUCING | STORY

Blockchain Technology

The blockchain It is one of the fastest growing technology platforms in history, outpacing the growth of the world wide web also a public ledger that records cryptocurrency transactions.

A novel solution accomplishes this without any trusted central authority and performed by a network of communicating nodes running software. Network nodes can validate transactions, add them to their copy of the ledger, and then broadcast these ledger additions to other nodes. The blockchain is a distributed database – to achieve independent verification of the chain of ownership of any and every coin amount, each network node stores its own copy of the blockchain.

What is Bahtcoin?

In recent years, cryptocurrencies have grown from digital novelties to trillion-dollar technologies. In the span of a few years mass adoption for crypto currencies is on the rise and blockchain technology has become increasingly essential and is positively impacting many aspects of our lives such as BTC, ETH, Decentralized finance is providing new opportunities for how we trading. Integrating blockchain technology with coding science has opened the business opportunities for people to study new technologies in finance, turning assets into digital assets. The advantage is that the data is recorded accurately, quickly, and cannot be edited, and it can be transparently monitored and, importantly, secure. We are intended to be a part of making this ecosystem easier to use digital assets.

INTRODUCING | STORY

And to make world's currency have a higher market value and become one of the most valuable digital tokens. Our goal and primary are to provide convenience for users to create the first Token which could require adding more choice for people to use a digital token to facilitate digital assets transactions. We have developed BLOCKCHAIN ACCESSION AND HIGH TECHNOLOGY or “Bahtcoin” as a utility token to be available to use globally by available on trusted DEX blockchain.

Bahtcoin Token is a utility token built for use as a digital asset which is built for digital trading. Bahtcoin has been developed based on technology, blockchain, and smart contract capabilities that everyone can access. It is secure and can effectively accommodate an increase in the number of transactions.

Story of BAHTCOIN

“Bahtcoin” (BLOCKCHAIN ACCESSION HIGH TECHNOLOGY) Project has an idea of wanting to be a part of the future and investing with cryptocurrencies and digital asset exchange. So, we came up with this project called Bahtcoin, so that all users have the opportunity to access the use of digital money and get ready for a future cashless society to be traded, exchange for various investment assets as well and can be used all over the world.

INTRODUCING | MISSION

We establish to solve major problems afflicting upstream, midstream, and downstream players in the supply chain. These problems include high transaction costs, low financial liquidity of middlemen and creative workers, inability to liquidize digital assets, content distribution with unclear ownership rights, and unfairness of income distribution. We believe that fair economic infrastructure is necessary to solve these problems. To create such infrastructure, uses blockchain technology and smart contract. Decentralized Financial Services, and Wallet-to-Wallet (W2W) Decentralized Commerce through the trusted E-wallet with this economic infrastructure.

Vision

To distribute economic and financial opportunities to everyone equally and ensure transparency and security of assets in the reliable exchange. It has a fast-processing capability, combined with creating a complete composition of the ecosystem, which allows users to participate in the drive for transparent fintech technologies and genuinely benefit from the ecosystem.

Mission

To provide people and Global access to use Bahtcoin for trading and keep it as a valuable asset with a secure fintech technology. So, we have used a trusted ecosystem to support the participant.

GOAL | OUR PURPOSE

which provides customers with digital assets. The customers could trade all digital assets by a method of payment with a low fee. The E-Wallet system creation and development operation aims to enable customers to use Bahtcoin trading more reliable.

THE DIGITAL AND CREATIVE INDUSTRIES

The global Digital Supply Chains, which include content creation by creative workers, content distribution platforms, and digital commerce, Creative workers, companies, and individuals.

Distributor benefits, Value proposition

Bahtcoin Token has an ecosystem partner to support token usability through the E-Commerce platform, Mobile Applications, and E-Wallet to allow the participants to have a convenient trading system for assets trading and have a secure e-wallet which is easy to use, receive, send and trade. Creating a complete component of the financial ecosystem will enable all groups of users of Bahtcoin to genuinely benefit from the Bahtcoin ecosystem.

Purpose

Bahtcoin was established to offer total decentralized solutions for the above-mentioned problems. High transaction costs, lack of financial liquidity, cross-platform exchange difficulties, there are fundamental problems amongst payment processors, gateways, and financial institutions versus creative platforms, content providers and audiences

GOAL | OUR PURPOSE

in the supply chain. They are all facing similar problems with centralized financial platforms including payment processors and gateways and financial institutions.

This includes high transaction costs for nano transactions and lack of financial liquidity. Creative workers are unable to use their works as collaterals because banks do not see the value in their works. Although the content platforms have been trying to solve these problems through their internal tokens, there come problems regarding cross-platform exchange difficulties. Tokens from one platform cannot be used with another platform and digital contents in one platform cannot move around to other platforms as easily as it should be. This is due to their own standard information silos, which makes it impossible for users to monetize the tokens and creative workers to liquidize their digital assets in different platforms.

PLATFORM OVERVIEW | MARKET CONCEPT

There are many kinds of cryptocurrencies today. These platforms are very good at their specific specializations, with each finding its own market in the global financial services industry. Although most of these coins or tokens are in their early stages, the future of blockchain technology is going to be stronger, mainstream adoption will come in the form of practical and easy to use platforms based on cryptocurrencies and blockchains.

“Bahtcoin” (BLOCKCHAIN ACCESION HIGH TECHNOLOGY) will be introduced in 2022, and will be used as a digital utility token for several world Citizens that will include, and other features, an exchange, trading, etc. Bahtcoin is a way for its users to use cryptocurrencies and allow members to participate in exclusive projects in global.

The next stages of the Project will start with the improvement of the cryptocurrency platform and ecosystem, as well as more exciting projects and opportunities for its members and users.

PLATFORM OVERVIEW | ECOSYSTEM

Bahtcoin has begun joining of cryptocurrency platforms for cross-border digital asset trading by using reliable cryptocurrency wallet and will allow all users to use a supported platform for start the trade in the convenience way.

PLATFORM OVERVIEW | ECOSYSTEM

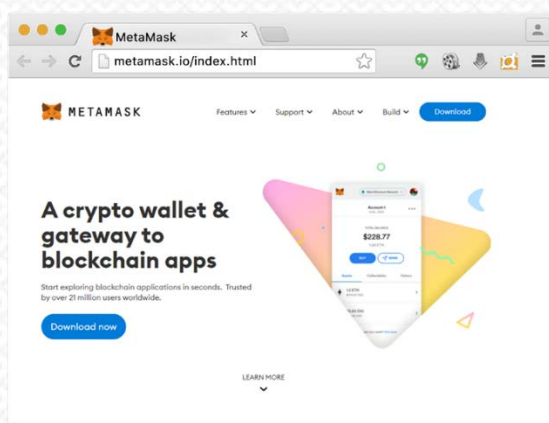

PLATFORM OVERVIEW | WALLET

METAMASK WALLET

MetaMask is a software cryptocurrency wallet used to interact with the Ethereum blockchain. It allows users to access their Ethereum wallet through a browser extension or mobile app, which can be used to interact with decentralized applications. MetaMask is developed by a blockchain software company focusing on Ethereum-based tools and infrastructure. MetaMask allows users to store and manage account keys, broadcast transactions, send and receive cryptocurrencies and tokens, and securely connect to decentralized applications through a compatible web browser or the mobile app's built-in browser.

The application includes work by swap tokens directly from your desktop or mobile wallet. The Swaps feature combines data from decentralized exchange aggregators, market makers, and DEXs, to ensure you get the very best price with the lowest network fees also application made available for free on iOS, Android, and Web platforms. The wallet will allow users to send and receive cryptocurrencies like Bitcoin, Ether, and Ripple, as well as Bahtcoin.

PLATFORM OVERVIEW | WALLET

Privacy and Security

The use of a seed phrase, or Secret Recovery Phrase, is a standard most crypto wallets use. It's generated randomly when you create a MetaMask account, which is unique, and serves to generate addresses. To create a MetaMask wallet, you are given your 12-word Secret Recovery Phrase. MetaMask does not control any of your personal or private data on our servers. Everything is encrypted in your browser and protected via your MetaMask password. So, when you lose your MetaMask accounts, and need to restore MetaMask, you can only do that with your Secret Recovery Phrase. MetaMask provides you with a unique 12-word Secret Recovery Phrase on the very first launch. If you did not write it down, or you lost it, you can log into MetaMask and reveal your Secret Recovery Phrase.

DO NOT share this phrase with anyone! These words can be used to steal all your accounts. You can't edit or change your Secret Recovery Phrase. If you are unable to log back into MetaMask, due to forgetting password, there is no way to recover the phrase. The Decentralized Web is exploding with economic activity and has the potential for incredible growth. While this attracts a lot of well-deserved attention.

Rugpulls

A rugpull is the term that has been popularized to describe the DeFi equivalent, there isn't just one token or cryptocurrency per blockchain. In fact, the Ethereum blockchain has on it an incredible number of cryptocurrencies and creating a new one is a straightforward

PLATFORM OVERVIEW | WALLET

procedure. Not only are they easy to create, but you can name them whatever you want, which can make identifying legitimate tokens particularly difficult.

BEP20

Binance Smart Chain Evolution Proposal BEP20 is the standard for creating tokens on BSC, or using Binance Smart Chain development. Tokens are a valuable component of any blockchain based system or economy. They facilitate the movement of value and help track every activity on the blockchain. In other words, they are key to conducting many kinds of transactions. In many ways, it's similar to Ethereum's ERC20 standard; in other ways, it expands on it. BEP20 sets rules that all tokens created on BSC need to follow.

The BEP20 token standard on BSC applies to any token that is launched or created on Binance Smart Chain's platform. Examples of such tokens are utility tokens, stablecoins, and security tokens.

BAHTCOIN TOKEN

Bahtcoin Token technical details : BEP20

Total Supply : 100,000,000

Name : Bahtcoin (BLOCKCHAIN ACCESION HIGH TECHNOLOGY)

Symbol : BHT

Bahtcoin is a cryptocurrency token issued by one of our projects using BEP20, which resides on the Blockchain. The purpose of these tokens is to allow users to be able to use these coins in the Global trading in cryptocurrency world such as for bidding the NFTs or any digital assets by using the MetaMask Wallet app and credible DEX website. They will also be able to trade these coins on Cryptocurrency exchanges, allowing others to buy them and use them if they wish to use our tokens.

SUMMARY

Intends to make the Bahtcoin a valuable ecosystem to its users and reach people around the world. One of our primary goals is to bring secure and reliable marketplace to people where they can trade products and services around the globe. Bahtcoin is a utility token that does not constitute any shareholding or securities. Holding Bahtcoin does not cause ownership or benefits or give shareholders rights or authority to manage. The model assumes, that the networking effect, reached by the increased circulation of token inside the ecosystem, will lead to simultaneous growth of token utility with respect to number of users and transactions. That correlation was proved by development history of prior cryptocurrencies and other projects tokens

This Whitepaper document is not an investment prospectus or presentation. It does not constitute a presentation of the sale of securities or an invitation to invest in securities under any jurisdiction. We create a fair economic infrastructure for all stakeholders in the digital and creative supply chains.

Benefits of holding Bahtcoin Tokens

For Business

To create enormous value Including businesses that are related to financial technology will allow the business to grow gracefully. Bahtcoin also wants to be part of the requirement

SUMMARY

for all investors for their global business goal. To make transactions easier, and faster. It will make users doing their business as easy as never before. Whether in trading for digital assets can be easily exchanged for Bahtcoin with low fees. There will be absolutely no exploitation of entrepreneurs.

For General users

With the growing popularity of digital asset ownership, it is important to turn your attention to crypto. But for beginners, may not understand the mechanics of the exchange, so they can risk high investments or maybe deceive by scammers. Therefore, Bahtcoin is a good starting point for investing as it has an easy access on DEX. And it's easy to trade through the world-renowned DEX and users assets are owned by the highly secure and popular like MetaMask.

ROAD MAP

Q1 2022 (January-March)

-Launch a website.

-Launch social media.

-Publish Whitepaper.

Q2 2022 (April-June)

-Launch tokens on the 2nd exchange.

Q3 2022 (July-September)

-Launch tokens on the 3rd exchange.

-Gather 1,000 members, share and update the news to members through community.

Q4 2022 (October-December)

- Plan to be listed on CoinGecko

DISCLAIMER

Please read this disclaimer section carefully.

This Whitepaper document was written only to describe future operational plans and the “Bahtcoin” (BLOCKCHAIN ACCESION HIGH TECHNOLOGY) ecosystem. We are not responsible for any damages (whether anticipated or not) from the person or organization bringing information about Bahtcoin or our ecosystem in this document to be referenced or interpreted without careful consideration. Company Executives, employees, agents, and stakeholders are not responsible for the reader receiving the information contained in this document and then interpreting, analyzing, anticipating, or republishing the information (whether due to negligence, personal opinions, etc.). Therefore, the information in this document should not be referred to in future action plans. At the same time, the action plan outlined in this document may not occur due to risk factors such as limitations or technological errors, legal or standard control restrictions, market mechanisms, company discretion, data discrepancies, or any changes that may occur.

Our Company shall not be responsible for any loss of token or situations making it impossible to access our tokens, which may result from any actions or omissions of the user or any person undertaking to acquire as well as in case of hacker attacks. The purchaser of Bahtcoin tokens acknowledges that some people understand and has a significant experience with cryptocurrencies, blockchain systems and services, and that she/he fully understands the risks associated with the crowd sale as well as the mechanism related to the use of token/cryptocurrencies.

You agree and acknowledge that the Bahtcoin is not liable for any indirect, special, incidental, consequential or other losses of any kind, in tort, contract or otherwise, including but not limited to loss of revenue, income or profits, or loss of use or data, or loss of reputation, or loss of any economic or other opportunity of whatever nature or however arising.

DISCLAIMER

Therefore, user should carefully consider the risks, costs and benefits of acquiring. Furthermore, any malfunction, unplanned function or unexpected operation of the BEP-20 protocol may cause the Company's network or Bahtcoin token to malfunction or operate in a way that is not expected.

This document and information contained herein may not be sent and or addressed wholly or in part, directly or indirectly, to any person in the United States or Singapore, or any other jurisdiction in which it would be impermissible or otherwise restricted to offer, distribute, purchase, sell or retain cryptographic tokens.

PLEASE READ ALL PARTS OF THIS NOTICE CAREFULLY. THIS WHITEPAPER IS TO BE READ IN CONJUNCTION WITH THE TOKEN SALE AGREEMENT AND ITS TERMS AND CONDITIONS TO BE SUPPLIED.

All definitions contained in this notice shall bear the same meaning as provided in the Whitepaper unless stated otherwise.

BAHTCOIN is not intended to constitute:

1. securities in any jurisdiction.
2. currency of any kind.
3. stocks, shares or debentures.
4. units in a collective investment scheme or business trust.
5. equity in an investment fund.

DISCLAIMER

Any regulation or legislation applicable to securities or to any of (1 to 5) above will not be applicable to this Whitepaper and the Bahtcoin offering. This Whitepaper does not constitute a prospectus or offer document, nor is it an offer of securities or an attempted solicitation for investment in securities in any jurisdiction. This Whitepaper and the Bahtcoin offering have not been approved by any regulatory body in any jurisdiction.
